

## M. ANANTHRAJ

**Automation Test Engineer | Selenium | Java | Cucumber | Generative AI Test Automation**

Phone: +91-6374952230 | Email: [ananthrajm14@gmail.com](mailto:ananthrajm14@gmail.com) | Chennai, India

### PROFESSIONAL SUMMARY

Automation Test Engineer with nearly **4 years** of experience in **Manual & Automation Testing** including **Selenium, Java, Cucumber, TestNG, and API Testing**. Hands-on experience building automation frameworks, executing regression suites, integrating CI/CD pipelines, and collaborating in Agile environments. Recently leveraged **Generative AI** tools to accelerate testing productivity, script generation, documentation, and defect analysis.

### CORE SKILLS

**Automation:** Selenium WebDriver, TestNG, JUnit, Cucumber, POM, Rest Assured

**Programming:** Core Java, Python

**API Testing:** REST API, Postman, JSON Validation

**Tools:** Git, Jenkins, Maven, BrowserStack, Jira

**Methodologies:** Agile Scrum, SDLC, STLC, Regression, Sanity, Functional Testing

**Generative AI:** ChatGPT, Copilot, AI-assisted Test Script Generation, AI-based Documentation & Defect Analysis

### GENERATIVE AI EXPERIENCE

- 1 Used AI tools to assist in Selenium and Cucumber script creation, optimization, and debugging
- 2 Utilized AI for test case generation, scenario brainstorming, edge case discovery, and documentation improvement.
- 3 Applied AI for quick debugging support and framework design suggestions.
- 4 Leveraged AI for API payload validation logic ideas & JSON parsing assistance.

### PROFESSIONAL EXPERIENCE

**Technical Consultant — Perficient, Chennai (May 2024 – Dec 2025)**

- Performed manual functional, regression, sanity and UI testing across multiple web applications
- Designed and executed test scenarios, test cases and test data based on business requirements
- Participated in sprint testing, backlog refinement, and defect triage in an Agile environment
- Logged, tracked and verified defects using Jira, collaborating closely with developers for closure
- Prepared test execution reports, defect summary reports and daily status updates

## **Automation Test Engineer — SecureKloud Technologies, Chennai (Jan 2022 – Apr 2024)**

- Designed Automation Frameworks using Selenium WebDriver with Java
- Developed BDD test scripts with Cucumber and performed API validations
- Executed Sanity, Functional, Regression & UI testing
- Tested across Web & Mobile platforms using BrowserStack
- Raised and tracked defects ensuring closure
- Reduced regression execution time by **30–40%** using automation
- Automated **200+** test cases

## **PROJECTS**

### **ForgeRock**

- 1 Built automation scripts using Selenium WebDriver + Cucumber
- 2 Implemented POM & Data-Driven automation frameworks
- 3 Performed regression suite execution via Jenkins CI
- 4 Managed test assets & defects in Jira
- 5 Executed web & mobile testing including BrowserStack

### **HealthFirst**

- Prepared **Test Plans, Test Scenarios, and Test Cases** based on business and API requirements
- Participated in **Requirement Analysis and Agile ceremonies** (Sprint Planning, Daily Stand-ups, Retrospectives)
- Performed **API testing using Rest Assured** for RESTful services
- Validated **HTTP status codes, request/response payloads, headers, and JSON schema** using Rest Assured
- Executed test cycles and reported defects using **Jira**
- Created **test execution reports and defect summary reports**

## **CERTIFICATION**

Python Professional Certificate

## **EDUCATION**

B.Tech – Petrochemical Technology, Anna University (BIT Campus), Trichy
